EDUCATION

Texas A&M University College of Engineering

Bachelor of Science in Electronic Systems Engineering Technology | GPA: 3.2

College Station, TX

Aug. 2022 – May 2026

EXPERIENCE

Society of Automotive Engineers (SAE) Formula Electric

Performance Engineer

College Station, TX

Aug 2023 – May 2024

- Led team efforts to design and program a testing **wire harness** capable of reading data from multiple **sensors** on FSAE **electric car**. Analyzed data in **RaceStudio3** and **MatLab** to decrease lap time by **13%**
- Developed **full power diagram** spanning scope of multiple teams, managed **BOM** and reduced sub team cost by nearly **15%**
- Programmed PCBs (designed in **KiCad**) and Arduinos in **C** to communicate with **CAN**
- Analyzed battery options and fixed **safety issue** by using **18650 Cells** over **Pouch Cells** extending low voltage parts run time by **%11**

Aggie Coding Club (ACC)

Fullstack Dev

College Station, TX

Aug 2022 – Jan 2023

- Designed in **Figma** and programmed in **Next.js** a website for non-profit organization aiding disaster relief
- Added **accessibility options** including high contrast, keyboard accessibility, and resizable text bringing up **SERP ratings** to **#1**
- Developed a **basic HTML version** of the website that can be loaded in low bandwidth conditions
- Analyzed different JS frameworks, recommended **Svelte** to achieve quicker build time via **AOT compilation**

SpaceCraft VR

Cloud/Automation and Commercialization Engineer

College Station, TX

Jan 2023 – Current

- Creating and deploying a website capable of managing teams and licensing for a software used to train astronauts and engineers, done in **Next.js**
- Integrated **typesafe routing**, optimized **UI**, added **download GUI**, developed a program which would allow for assets made in blender to be exported to be viewed and interacted with in VR

Undergraduate Teaching Assistant

Texas A&M

College Station, TX

Aug 2024 – Current

- Overseeing and aiding students **conducting lab** and ensuring a safe learning environment
- Conducted **office hours** to provide individualized assistance, enhancing students' comprehension of course materials

LEADERSHIP & INVOLVEMENT

Aggie Coding Club (ACC)

Project Manager

City, State

Jan 2023 – May 2023

- Spearheaded a team of 17 novice programmers to develop a video-sharing website
- Conducted **12+ workshops** on frontend and backend development to help newcomers master full stack development
- Employed a ticket system to reduce delays by **30%** and reduce development time on average by **20%**

SKILLS, ACTIVITIES & INTERESTS

Software: C, C++, Python, Assembly, JavaScript, HTML/CSS, R, Excel, Cyber Security in Linux

Hardware: Arduino, Raspberry Pi, MultiSim, KiCad, RapidHarness, Quartus, Wire Harnessing, Soldering

Certifications & Training: ML in R (Udemy), Python machine learning with TAMU HPRC

Projects: Gas leak detector live over WiFi readings, Identifying bee populations with ML, Reaction game using assembly on TI microprocessor, Auto lacing shoes, RFID door lock, Automated plant watering, Ultrasonic sonar, IR barrier sensor, Auto intensity control lights
